- **PRODUCTS ARE DISPLAYED AT MULTIPLE LOCATIONS IN THE STORE**

MERLIN VENS SAFE KIOSK

SELECT & COLLECT PRODUCTS

Vensafe is a Select & Collect solution for premium price products and tobacco. It minimises losses, achieves compliance with tobacco regulations and optimises inventory operations. The patented technology of Vensafe enables dispensing products of multiple sizes and shapes from a single dispenser unit. This enables sales of a large variety of products.

- Vensafe dispensers can operate as a single unit (up to 80 different products and a total of 1 600 articles) or can be linked with up to six units (480 different products and 9600 articles!).
- The dispenser can be delivered with a cooling system that supports temperatures down to 8 degrees Celcius.
- The dispenser displays stock levels and indicates which products need refilling. Out-of-stock alerts are sent via e-mail.
- Internal shrinkage is controlled with hardware security features and time-stamp logging of every interaction with the system.
- The system logs every transaction and alerts if the specific product transaction card/receipt is paid for, and if that product has been retrieved or not.

The implementation:

Vensafe offers operational consulting and intergration services to ensure that the implementation is done successfully. This secures the return on investment and ensures optimised operations.

The **Retail Suite Vensafe Manager** allows for hassle-free daily management of all Vensafe operations and saves labour resources. All solutions in the store can be monitored and operated from one single point – a PC, a tablet, a mobile phone, or from a central office. Adding and editing products is simple with visual setup tools, integrated barcode scanners and other productivity features. Operations are improved with real-time overview of stock levels, kiosks and dispenser statuses. The software is easily accessed from the dispenser touch screen or from the back office.

Technical data:

- Dimensions: 90 (W) x 91 (D) x 223(H)cm
- Max capacity per dispenser: 1600 art.
- Extra storage: 2 drawers (680 articles each)
- Weight master: 165 kg (empty)
- Weight Extra unit: 150 kg
- Weight Extra cool unit: 170 kg
- Voltage: 100V – 240V/ 50- 60 Hz
- Power: 160W without cooling
- Cooling: 8 degrees, Cooling capacity: 390W
- Interface to POS: LAN
- Operating system: Windows 7 & 10

Application:

- Retail Suite
- Retail Suite Vensafe manager

Warranty:

- 12 months parts and factory errors
- Optional (all-in) service contract
